

UPGRADE CORE LOSS TESTER UPGRADE SYSTEM

Core Loss testing is one of the critical quality assurance tools in the motor repair industry. LEXSECO provides proven technology that is vital in today's competitive markets.

LEXSECO offers our customers an effective and affordable upgrade package for older core loss testers. The upgrade package provides:

- Fully automated test process
- Flux Measurement accuracy of $\pm 0.1\%$ per range
- **MP6.0™ Multiparameter Software**
- New **Flux Metering System**
- Measurement system specifically designed for core loss testing
- NIST compliant & certified calibration
- New control components
- New desktop with computer and printer
- Rebuilding of existing cabinet
- Complete test and verification

All of this for HALF the cost of a new Core Loss Tester!

The upgrade requires 2 to 4 weeks at the factory or 1 to 2 days in the field. A 10KVA tester is available for rent while the upgrade is in process. A 1 year warranty is standard on all LEXSECO upgrade systems.
